UNITED STATES FOREIGN TRADE

SUMMARY REPORT
FT 930-I

APRIL 1960

FOR RELEASE
June 8, 1960

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States imports for consumption from \$1,366.1 million in March to \$1,246.3 million in April, a decline of about nine percent, was primarily the result of sizeable decreases in imports of semi-manufactures, finished manufactures and crude foodstuffs. April imports for consumption were, however, about three percent more than the April 1959 total of \$1,209.1 million.

The Bureau stated that for the first four months of 1960, imports for consumption amounted to \$5,063.5 million, an increase of about seven percent over the \$4,724.5 million reported for the corresponding period of 1959.

From March to April, imports of semimanufactures fell from \$308.3 to \$254.8 million owing chiefly to decreases in imports of individual items included in this economic class as follows: gas and fuel oil, from \$53.6 to \$43.6 million; iron and steel semimanufactures, from \$32.4 to \$23.1 million; aluminum, from \$11.2 to \$6.3 million; nickel and alloys, from \$14.5 to \$10.3 million; copper, from \$23.9 to \$20.6 million; and wood pulp, from \$26.7 to \$23.5 million. Lower levels of imports of auto-

mobiles and parts, from \$83.5 to \$71.9 million; steel mill products, from \$36.9 to \$28.9 million; wool manufactures, from \$19.0 to \$14.2 million, and newsprint, from \$58.1 to \$54.6 million, largely accounted for the decline in imports of finished manufactures, from \$498.5 to \$457.5 million. Imports of crude foodstuffs fell from \$166.2 to \$140.0 million owing chiefly to a substantial decrease in imports of coffee from \$95.1 to \$74.7 million.

Imports of crude materials fell from \$261.3 million in March to \$255.1 million in April. Reflected in this change were decreases in imports of ferroalloying ores, from \$16.8 to \$10.0 million, unmanufactured wool, from \$13.5 to \$9.0 million and less noticeable decreases in imports of many other items included in this class, which were largely offset by increases in imports of crude petroleum from \$70.1 to \$76.8 million and zinc, from \$1.7 to \$7.0 million.

During the period, imports of manufactured foodstuffs advanced from \$131.8 to \$138.9 million largely as a result of an increase in imports of meat products, from \$22.1 to \$30.1 million.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report, but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. Import values also exclude United States import duties. None of the values have been adjusted for changes in price level.

EFFECT OF SAMPLING: Formal entry shipments valued less than \$100 and informal entry shipments valued \$250 or less (less than one percent of total import value) are estimated by sampling. These estimated values are shown in the tables of this report as "Estimated value \$1-\$99 formal and \$1-\$250 informal entry shipments" and are arbitrarily included in the total for "Finished manufactures." The largest variation from rounding of figures is \$50,000.

Further information regarding coverage, valuation, etc., is contained in the "General Explanation" in foreword of Report No. FT 110. For complete statement, see the foreword in Foreign Commerce and Navigation of the United States.

Prepared in the Bureau of the Census, Foreign Trade Division

UNITED STATES IMPORTS FOR CONSUMPTION OF MERCHANDISE, BY ECONOMIC CLASSES AND LEADING COMMODITIES:
APRIL 1960 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. Imports for consumption are a total of imports for immediate consumption plus withdrawals for consumption from bonded warehouses. Figures for 1960 are as originally issued and have not been revised to include published corrections. Figures for 1959 include revisions published with the December 1959 reports, or earlier, but do not include revisions published during 1960. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts. See the "Explanation of Statistics" for information on sampling procedures.)
